INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS

STEP ONE:

Clean the lower 45" of the door and frame with isopropyl rubbing alcohol. *Using other cleaners may leave a residue.

STEP TWO:

Pull the door closed. Align strip to desired position along the door frame. *You may want to raise the guard 2-6" off the floor for older children. Press the strip against door to flatten crease and mark the edges with a pencil.

STEP THREE:

Push the door open. Peel the red liner marked **DOOR** and **LIGHTLY** stick to the door, parallel to your pencil mark. *Adjustments may be necessary. Open and close the door to check for clearance and alignment.

STEP FOUR:

Peel the red liner marked **FRAME** and **LIGHTLY*** stick to the frame side on the door stop. *Adjustments may be necessary. Open and close the door to check for clearance and alignment.

STEP FIVE:

Fingersafe should fold flat against the frame. Apply pressure evenly to set the tape permanently on both sides. Congratulations! Your door is now "Fingersafe".

IF ASSISTANCE IS NEEDED: Call our Customer Service Department 9:00am-5:00pm EST or email: Info@Fingersafe.com | Customer Service: 1-888-FING-SAF (246-4723) or 912-234-6120
